Agricultural Water Management 28 (1995) 357–365

Agricultural water management

Subject Index, Volumes 27–28

Acid sulphate soils
Evaluation of water management strategies for acid sulphate soils using a simulation model: A case study in Indonesia, 27 (1995) 125

Aerodynamic resistance
Willow stand evapotranspiration simulated for Swedish soils, 28 (1995) 271

Agriculture
Evaluation of water management strategies for acid sulphate soils using a simulation model: A case study in Indonesia, 27 (1995) 125

Air entrapment
Consideration of air entrapment in surface irrigation; A computer simulation study, 28 (1995) 245

A pan evaporation
Water use and yield of greenhouse grown eggplant under drip irrigation, 28 (1995) 113

Applied N
Effects of crop species and applied N on soil moisture, 28 (1995) 223

Aquaculture effluent
Effect of irrigation and nitrogen on water use efficiency of wheat in Saudi Arabia, 27 (1995) 143

Atmospheric deposition
Factors influencing dissolved nitrogen concentrations and loadings in upland streams of the UK, 27 (1995) 181

Australia
Penman–Monteith, FAO-24 reference crop evapotranspiration and class-A pan data in Australia, 28 (1995) 9

Bangladesh
Yield-water relations and nitrogen utilization by wheat in salt-affected soils of Bangladesh, 28 (1995) 49

Bergamot mint
Irrigation and nitrogen requirements of Bergamot mint on a sandy loam soil under sub-tropical conditions, 27 (1995) 45

Biomass
Effect of irrigation and nitrogen on water use efficiency of wheat in Saudi Arabia, 27 (1995) 143

Broadbed and furrow
Soil water dynamics under cereal and forage legume mixtures on drained vertisols in the Ethiopian highlands, 27 (1995) 17

Canal networks
Sensitivity of predicted irrigation-delivery performance to hydraulic and hydrologic uncertainty, 27 (1995) 267

Canopy reflectance
Remote sensing of crop coefficients for improving the irrigation scheduling of corn, 27 (1995) 55

Clay
Leaching of salt from a heavy clay subsoil under simulated rainfall conditions, 27 (1995) 319

Clogging risk
Laboratory evaluation of locally made synthetic envelopes for subsurface drainage in Egypt, 27 (1995) 349

Compromise programming
Equity and efficiency issues in irrigation water distribution, 28 (1995) 335

Computer model
Evaluation of water management strategies for acid sulphate soils using a simulation model: A case study in Indonesia, 27 (1995) 125

Computer simulation
Consideration of air entrapment in surface irrigation; A computer simulation study, 28 (1995) 245

Contaminants
Surge irrigation with residues to reduce soil erosion, 27 (1995) 281

Cowpeas
Effects of soil moisture stress on evapotranspiration partitioning, 28 (1995) 311

Crop
CROSOWAT: A decision tool for irrigation schedule, 27 (1995) 203

Crop coefficient
Remote sensing of crop coefficients for improving the irrigation scheduling of corn, 27 (1995) 55

Evaluation of sugarcane evapotranspiration from water table data in the everglades agricultural area, 27 (1995) 307

Evapotranspiration and crop coefficient of sweet lime under drip irrigation, 27 (1995) 329

Willow stand evapotranspiration simulated for Swedish soils, 28 (1995) 271

Crop species
Effects of crop species and applied N on soil moisture, 28 (1995) 223

Crop water balance
The impact of sparse millet crops on evaporation from soil in semi-arid Niger, 27 (1995) 225

Crop water stress index
Irrigation with brackish water under desert conditions X. Irrigation management of tomatoes (*Lycopersicon esculentum* Mills) on desert sand dunes, 28 (1995) 121

Delivery performance
Sensitivity of predicted irrigation-delivery performance to hydraulic and hydrologic uncertainty, 27 (1995) 267

Dissolved organic nitrogen
Factors influencing dissolved nitrogen concentrations and loadings in upland streams of the UK, 27 (1995) 181

Dissolved phosphorus
Influence of improved subsurface drainage on phosphorus losses and nitrogen leaching from a heavy clay soil, 28 (1995) 295

Drainage
Leaching of salt from a heavy clay subsoil under simulated rainfall conditions, 27 (1995) 319

Finite element modeling of subsurface drainage in Finnish heavy clay soils, 28 (1995) 35

Drain envelope
Drain pipe performance determined using a non-Darcy finite element model, 27 (1995) 259

Drain pipe
Drain pipe performance determined using a non-Darcy finite element model, 27 (1995) 259

Drip irrigation
Evapotranspiration and crop coefficient of sweet lime under drip irrigation, 27 (1995) 329

Efficiency
Equity and efficiency issues in irrigation water distribution, 28 (1995) 335

Electromagnetic induction
Using the EM38 to measure the effect of soil salinity on *Eucalyptus globulus* in south-western Australia, 27 (1995) 69

Element modeling
Finite element modeling of subsurface drainage in Finnish heavy clay soils, 28 (1995) 35

Envelope material
Evaluation of sieve and permeameter analyses methods for subsurface drain envelope laboratory research in Pakistan, 27 (1995) 167

Environment
Evaluation of water management strategies for acid sulphate soils using a simulation model: A case study in Indonesia, 27 (1995) 125

Equity
Equity and efficiency issues in irrigation water distribution, 28 (1995) 335

Erosion
Surge irrigation with residues to reduce soil erosion, 27 (1995) 281

Influence of improved subsurface drainage on phosphorus losses and nitrogen leaching from a heavy clay soil, 28 (1995) 295

Et_m/E_{pan} ratio
Water use and yield of greenhouse grown eggplant under drip irrigation, 28 (1995) 113

Eucalyptus globulus
Using the EM38 to measure the effect of soil salinity on *Eucalyptus globulus* in south-western Australia, 27 (1995) 69

Evaporation
The impact of sparse millet crops on evaporation from soil in semi-arid Niger, 27 (1995) 225

Evapotranspiration
Remote sensing of crop coefficients for improving the irrigation scheduling of corn, 27 (1995) 55

CROSOWAT: A decision tool for irrigation schedule, 27 (1995) 203

Simulation of evapotranspiration from groundnut under wet and dry conditions, 27 (1995) 297

Evaluation of sugarcane evapotranspiration from water table data in the everglades agricultural area, 27 (1995) 307

Evapotranspiration and crop coefficient of sweet lime under drip irrigation, 27 (1995) 329

Statistical procedures for the evaluation of evapotranspiration computing models, 27 (1995) 363

Water use and yield of greenhouse grown eggplant under drip irrigation, 28 (1995) 113

Evapotranspiration partitioning
Effects of soil moisture stress on evapotranspiration partitioning, 28 (1995) 311

Everglades
Evaluation of sugarcane evapotranspiration from water table data in the everglades agricultural area, 27 (1995) 307

FAO-24
Penman–Monteith, FAO-24 reference crop evapotranspiration and class-A pan data in Australia, 28 (1995) 9

Fertilisers
Surge irrigation with residues to reduce soil erosion, 27 (1995) 281

Leaching of lime and fertilisers from a reseeded upland pasture on a stagnogley soil in mid-Wales, 28 (1995) 95

Finite element method
Drain pipe performance determined using a non-Darcy finite element model, 27 (1995) 259

Furrow irrigation
Water movement and salt leaching in drained and irrigated marsh soils of southwest Spain., 27 (1995) 25

Two-dimensional infiltration under furrow irrigation: modelling, its validation and applications, 27 (1995) 105

Modelling of furrow irrigation. Advance with two-dimensional infiltration, 28 (1995) 201

Furrows
Surge irrigation with residues to reduce soil erosion, 27 (1995) 281

Fuzzy inference
Forecasting system of irrigation water on paddy field by fuzzy theory, 28 (1995) 163

Fuzzy set
Forecasting system of irrigation water on paddy field by fuzzy theory, 28 (1995) 163

Grain sorghum yield
Water efficiency and stress on grain sorghum at different reproductive stages, 28 (1995) 23

Grain yield
Effect of irrigation and nitrogen on water use efficiency of wheat in Saudi Arabia, 27 (1995) 143

Ground cover
Effects of soil moisture stress on evapotranspiration partitioning, 28 (1995) 311

Growth rate
THERESA: II. Thickness variations of vertisols for indicating water status in soil and plants, 28 (1995) 149

Heavy clay
Finite element modeling of subsurface drainage in Finnish heavy clay soils, 28 (1995) 35

Herb and essential oil yields
Irrigation and nitrogen requirements of Bergamot mint on a sandy loam soil under sub-tropical conditions, 27 (1995) 45

Infiltration
Consideration of air entrapment in surface irrigation; A computer simulation study, 28 (1995) 245

Intercropping
Soil water dynamics under cereal and forage legume mixtures on drained vertisols in the Ethiopian highlands, 27 (1995) 17

Irrigation
Irrigation and nitrogen requirements of Bergamot mint on a sandy loam soil under sub-tropical conditions, 27 (1995) 45

Water use for upland irrigation in a humid region of Japan, 28 (1995) 185

Irrigation application efficiency
Evapotranspiration and crop coefficient of sweet lime under drip irrigation, 27 (1995) 329

Irrigation scheduling
Remote sensing of crop coefficients for improving the irrigation scheduling of corn, 27 (1995) 55

CROSOWAT: A decision tool for irrigation schedule, 27 (1995) 203

Irrigation water requirement
Forecasting system of irrigation water on paddy field by fuzzy theory, 28 (1995) 163

Japan
Water use for upland irrigation in a humid region of Japan, 28 (1995) 185

Kriging
Spatial variability of total porosity, air entry potential and saturation water content in a cultivated inceptisol. II. Estimation through kriging, 27 (1995) 11

Landuse
Factors influencing dissolved nitrogen concentrations and loadings in upland streams of the UK, 27 (1995) 181

Leaching
Leaching of salt from a heavy clay subsoil under simulated rainfall conditions, 27 (1995) 319

Leaching of lime and fertilisers from a reseeded upland pasture on a stagnogley soil in mid-Wales, 28 (1995) 95

Influence of improved subsurface drainage on phosphorus losses and nitrogen leaching from a heavy clay soil, 28 (1995) 295

Leaf area index
Willow stand evapotranspiration simulated for Swedish soils, 28 (1995) 271

Effects of soil moisture stress on evapotranspiration partitioning, 28 (1995) 311

Lime
Leaching of lime and fertilisers from a reseeded upland pasture on a stagnogley soil in mid-Wales, 28 (1995) 95

Linalool and linalyl acetate content
Irrigation and nitrogen requirements of Bergamot mint on a sandy loam soil under sub-tropical conditions, 27 (1995) 45

Low rainfall
Growth of species in a tree plantation and its influence on salinity and groundwater in the 400 mm rainfall region of south-western Australia, 28 (1995) 231

Macropore
Finite element modeling of subsurface drainage in Finnish heavy clay soils, 28 (1995) 35

Maize
An alternative plastic mulching system for improved water management in dryland maize production, 27 (1995) 155

Mathematical model
Comparison between simulated and measured profile water distribution, 27 (1995) 339

Matric water
THERESA: II. Thickness variations of vertisols for indicating water status in soil and plants, 28 (1995) 149

Microlysimeters
The impact of sparse millet crops on evaporation from soil in semi-arid Niger, 27 (1995) 225

Minimum error
Spatial variability of total porosity, air entry potential and saturation water content in a cultivated inceptisol. II. Estimation through kriging, 27 (1995) 11

Model
The impact of sparse millet crops on evaporation from soil in semi-arid Niger, 27 (1995) 225

Moisture regimes
Simulation of evapotranspiration from groundnut under wet and dry conditions, 27 (1995) 297

Mulching
An alternative plastic mulching system for improved water management in dryland maize production, 27 (1995) 155

Nitrate
Factors influencing dissolved nitrogen concentrations and loadings in upland streams of the UK, 27 (1995) 181

Nitrogen
Effect of irrigation and nitrogen on water use efficiency of wheat in Saudi Arabia, 27 (1995) 143

Influence of improved subsurface drainage on phosphorus losses and nitrogen leaching from a heavy clay soil, 28 (1995) 295

Nitrogen utilized ion
Yield-water relations and nitrogen utilization by wheat in salt-affected soils of Bangladesh, 28 (1995) 49

Non-Darcy flow
Drain pipe performance determined using a non-Darcy finite element model, 27 (1995) 259

Normal distribution
Spatial variability of total porosity, air entry potential and saturation water content in a cultivated inceptisol. I. Semivariance analysis, 27 (1995) 1

Normal shrinkage
THERESA: I. Matric water content measurements through thickness variations in vertisols, 28 (1995) 133

Nugget variance
Spatial variability of total porosity, air entry potential and saturation water content in a cultivated inceptisol. I. Semivariance analysis, 27 (1995) 1

Optimization
Equity and efficiency issues in irrigation water distribution, 28 (1995) 335

Pakistan
Evaluation of sieve and permeameter analyses methods for subsurface drain envelope laboratory research in Pakistan, 27 (1995) 167

Pan evaporation
Penman–Monteith, FAO-24 reference crop evapotranspiration and class-A pan data in Australia, 28 (1995) 9

Particulate phosphorus
Influence of improved subsurface drainage on phosphorus losses and nitrogen leaching from a heavy clay soil, 28 (1995) 295

Pasture
Leaching of lime and fertilisers from a reseeded upland pasture on a stagnogley soil in mid-Wales, 28 (1995) 95

Pearl millet
The impact of sparse millet crops on evaporation from soil in semi-arid Niger, 27 (1995) 225

Penman–Monteith
Penman–Monteith, FAO-24 reference crop evapotranspiration and class-A pan data in Australia, 28 (1995) 9

Percolation
Estimating biomass through transfer functions based on simulation model results: a case study for the Sahel, 28 (1995) 57

Permeameter research
Laboratory evaluation of locally made synthetic envelopes for subsurface drainage in Egypt, 27 (1995) 349

Permeater
Evaluation of sieve and permeameter analyses methods for subsurface drain envelope laboratory research in Pakistan, 27 (1995) 167

Plant water status
Water efficiency and stress on grain sorghum at different reproductive stages, 28 (1995) 23

Plastic
An alternative plastic mulching system for improved water management in dryland maize production, 27 (1995) 155

Project distribution
Equity and efficiency issues in irrigation water distribution, 28 (1995) 335

Pulse irrigation
Irrigation with brackish water under desert conditions X. Irrigation management of tomatoes (*Lycopersicon esculentum* Mills) on desert sand dunes, 28 (1995) 121

Pyrite
Evaluation of water management strategies for acid sulphate soils using a simulation model: A case study in Indonesia, 27 (1995) 125

Quality
Irrigation with brackish water under desert conditions II. Salt tolerance in sweet-corn cultivars, 28 (1995) 325

Rainfall
Leaching of salt from a heavy clay subsoil under simulated rainfall conditions, 27 (1995) 319

Estimating biomass through transfer functions based on simulation model results: a case study for the Sahel, 28 (1995) 57

Reference crop evapotranspiration
Penman–Monteith, FAO-24 reference crop evapotranspiration and class-A pan data in Australia, 28 (1995) 9

Remote sensing
Remote sensing of crop coefficients for improving the irrigation scheduling of corn, 27 (1995) 55

Residue
Surge irrigation with residues to reduce soil erosion, 27 (1995) 281

Resources
Spatial variability of total porosity, air entry potential and saturation water content in a cultivated inceptisol. II. Estimation through kriging, 27 (1995) 11

Rhizosphere
Irrigation with brackish water under desert conditions X. Irrigation management of tomatoes (*Lycopersicon esculentum* Mills) on desert sand dunes, 28 (1995) 121

Richard's equation
Consideration of air entrapment in surface irrigation; A computer simulation study, 28 (1995) 245

Richards' equation in furrow irrigation
Modelling of furrow irrigation. Advance with two-dimensional infiltration, 28 (1995) 201

Root growth
CROSOWAT: A decision tool for irrigation schedule, 27 (1995) 203

Simulation of evapotranspiration from groundnut under wet and dry conditions, 27 (1995) 297

Rooting density
Comparison between simulated and measured profile water distribution, 27 (1995) 339

Saline soil
Water movement and salt leaching in drained and irrigated marsh soils of southwest Spain., 27 (1995) 25

Salinity
Using the EM38 to measure the effect of soil salinity on *Eucalyptus globulus* in south-western Australia, 27 (1995) 69

Leaching of salt from a heavy clay subsoil under simulated rainfall conditions, 27 (1995) 319

Yield-water relations and nitrogen utilization by wheat in salt-affected soils of Bangladesh, 28 (1995) 49

Growth of species in a tree plantation and its influence on salinity and groundwater in the 400 mm rainfall region of south-western Australia, 28 (1995) 231

Irrigation with brackish water under desert conditions II. Salt tolerance in sweet-corn cultivars, 28 (1995) 325

Salix
Willow stand evapotranspiration simulated for Swedish soils, 28 (1995) 271

Salt leaching
Water movement and salt leaching in drained and irrigated marsh soils of southwest Spain., 27 (1995) 25

Sap flow
THERESA: II. Thickness variations of vertisols for indicating water status in soil and plants, 28 (1995) 149

Semi-arid
An alternative plastic mulching system for improved water management in dryland maize production, 27 (1995) 155

Semivariance
Spatial variability of total porosity, air entry potential and saturation water content in a cultivated inceptisol. I. Semivariance analysis, 27 (1995) 1

Sensitivity
Sensitivity of predicted irrigation-delivery performance to hydraulic and hydrologic uncertainty, 27 (1995) 267

Simulation
Remote sensing of crop coefficients for improving the irrigation scheduling of corn, 27 (1995) 55

Comparison between simulated and measured profile water distribution, 27 (1995) 339

Equity and efficiency issues in irrigation water distribution, 28 (1995) 335

Simulation model
Simulation of evapotranspiration from groundnut under wet and dry conditions, 27 (1995) 297

Soil depth
Estimating biomass through transfer functions based on simulation model results: a case study for the Sahel, 28 (1995) 57

Soil evaporation
The impact of sparse millet crops on evaporation from soil in semi-arid Niger, 27 (1995) 225

Effects of soil moisture stress on evapotranspiration partitioning, 28 (1995) 311

Soil model
Willow stand evapotranspiration simulated for Swedish soils, 28 (1995) 271

Soil moisture
Effects of crop species and applied N on soil moisture, 28 (1995) 223

Soil retention
Laboratory evaluation of locally made synthetic envelopes for subsurface drainage in Egypt, 27 (1995) 349

Soil texture
Estimating biomass through transfer functions based on simulation model results: a case study for the Sahel, 28 (1995) 57

Soil water
Soil water dynamics under cereal and forage legume mixtures on drained vertisols in the Ethiopian highlands, 27 (1995) 17

Comparison between simulated and measured profile water distribution, 27 (1995) 339

Soil water diffusivity
Two-dimensional infiltration under furrow irrigation: modelling, its validation and applications, 27 (1995) 105

Soil water tension
Willow stand evapotranspiration simulated for Swedish soils, 28 (1995) 271

Solanum melongema L.
Water use and yield of greenhouse grown eggplant under drip irrigation, 28 (1995) 113

Sprinkler irrigation
Water movement and salt leaching in drained and irrigated marsh soils of southwest Spain., 27 (1995) 25

Statistical indicators
Statistical procedures for the evaluation of evapotranspiration computing models, 27 (1995) 363

Stochastic model
Sensitivity of predicted irrigation-delivery performance to hydraulic and hydrologic uncertainty, 27 (1995) 267

Stream water
Factors influencing dissolved nitrogen concentrations and loadings in upland streams of the UK, 27 (1995) 181

Structural shrinkage
THERESA: I. Matric water content measurements through thickness variations in vertisols, 28 (1995) 133

Subsurface drainage
Evaluation of sieve and permeameter analyses methods for subsurface drain envelope laboratory research in Pakistan, 27 (1995) 167

Laboratory evaluation of locally made synthetic envelopes for subsurface drainage in Egypt, 27 (1995) 349

Influence of improved subsurface drainage on phosphorus losses and nitrogen leaching from a heavy clay soil, 28 (1995) 295

Sugarcane
Evaluation of sugarcane evapotranspiration from water table data in the everglades agricultural area, 27 (1995) 307

Supplemental irrigation
Water efficiency and stress on grain sorghum at different reproductive stages, 28 (1995) 23

Surface irrigation
Surge irrigation with residues to reduce soil erosion, 27 (1995) 281

Consideration of air entrapment in surface irrigation; A computer simulation study, 28 (1995) 245

Surface resistance
Willow stand evapotranspiration simulated for Swedish soils, 28 (1995) 271

Surge irrigation
Surge irrigation with residues to reduce soil erosion, 27 (1995) 281

Consideration of air entrapment in surface irrigation; A computer simulation study, 28 (1995) 245

Sweet lime
Evapotranspiration and crop coefficient of sweet lime under drip irrigation, 27 (1995) 329

Synthetic envelopes
Laboratory evaluation of locally made synthetic envelopes for subsurface drainage in Egypt, 27 (1995) 349

Thickness changes
THERESA: I. Matric water content measurements through thickness variations in vertisols, 28 (1995) 133

THERESA: II. Thickness variations of vertisols for indicating water status in soil and plants, 28 (1995) 149

Transfer functions
Estimating biomass through transfer functions based on simulation model results: a case study for the Sahel, 28 (1995) 57

Trees
Growth of species in a tree plantation and its influence on salinity and groundwater in the 400 mm rainfall region of south-western Australia, 28 (1995) 231

***t*-statistic**
Statistical procedures for the evaluation of evapotranspiration computing models, 27 (1995) 363

Two dimensional flow
Two-dimensional infiltration under furrow irrigation: modelling, its validation and applications, 27 (1995) 105

Two-dimensional infiltration
Two-dimensional infiltration under furrow irrigation: modelling, its validation and applications, 27 (1995) 105

Modelling of furrow irrigation. Advance with two-dimensional infiltration, 28 (1995) 201

Upland
Factors influencing dissolved nitrogen concentrations and loadings in upland streams of the UK, 27 (1995) 181

Leaching of lime and fertilisers from a reseeded upland pasture on a stagnogley soil in mid-Wales, 28 (1995) 95

Vertisols
Soil water dynamics under cereal and forage legume mixtures on drained vertisols in the Ethiopian highlands, 27 (1995) 17

THERESA: I. Matric water content measurements through thickness variations in vertisols, 28 (1995) 133

THERESA: II. Thickness variations of vertisols for indicating water status in soil and plants, 28 (1995) 149

Washington
Surge irrigation with residues to reduce soil erosion, 27 (1995) 281

Water
Water use for upland irrigation in a humid region of Japan, 28 (1995) 185

Water balance
THERESA: II. Thickness variations of vertisols for indicating water status in soil and plants, 28 (1995) 149

Water content
THERESA: I. Matric water content measurements through thickness variations in vertisols, 28 (1995) 133

Water content distribution
Two-dimensional infiltration under furrow irrigation: modelling, its validation and applications, 27 (1995) 105

Water deficit
Water efficiency and stress on grain sorghum at different reproductive stages, 28 (1995) 23

Water harvesting
An alternative plastic mulching system for improved water management in dryland maize production, 27 (1995) 155

Water management
Evaluation of water management strategies for acid sulphate soils using a simulation model: A case study in Indonesia, 27 (1995) 125

Water movement
Water movement and salt leaching in drained and irrigated marsh soils of southwest Spain., 27 (1995) 25

Water potential
Irrigation with brackish water under desert conditions X. Irrigation management of tomatoes (*Lycopersicon esculentum* Mills) on desert sand dunes, 28 (1995) 121

Water quality
Leaching of lime and fertilisers from a reseeded upland pasture on a stagnogley soil in mid-Wales, 28 (1995) 95

Water resources management
Forecasting system of irrigation water on paddy field by fuzzy theory, 28 (1995) 163

Water retention curve
Willow stand evapotranspiration simulated for Swedish soils, 28 (1995) 271

Water table
Evaluation of sugarcane evapotranspiration from water table data in the everglades agricultural area, 27 (1995) 307

Water use efficiency
Irrigation and nitrogen requirements of Bergamot mint on a sandy loam soil under sub-tropical conditions, 27 (1995) 45

Effect of irrigation and nitrogen on water use efficiency of wheat in Saudi Arabia, 27 (1995) 143

Wheat
Yield-water relations and nitrogen utilization by wheat in salt-affected soils of Bangladesh, 28 (1995) 49

Yield parameters
Irrigation with brackish water under desert conditions II. Salt tolerance in sweet-corn cultivars, 28 (1995) 325

Yield–water relations
Yield-water relations and nitrogen utilization by wheat in salt-affected soils of Bangladesh, 28 (1995) 49

Zea mays
Irrigation with brackish water under desert conditions II. Salt tolerance in sweet-corn cultivars, 28 (1995) 325
